HOW TO PLAY PERCUSSION

You have several woodblocks and log drums at your disposal that can be used in any combination. Near each note (above) you can see a little box that indicates how often to play this instrument and whether to play in a regular pulse (R) or in an irregular way (IR). While you repeat, i.e. during one "note", you cannot change your instrument. Notes connected by a line belong to one sounding phrase and should be played attacca. Sonorous sounds, but never loud.
